Source: BRFSS survey data, 1998-2003 Connecticut Department of Public Health

All race and ethnicity specific data are age-adjusted.

Confidence intervals can be constructed as rate +/- margin of error.

Graphics with confidence intervals can be constructed in Excel, using the margins of error.

The data tables were produced for the Connecticut Health Foundation as part of the Community Health Data Scan, March, 2007.

For further notes and further information on these data, see [www.cthealth.org](http://www.cthealth.org)
